

iPhone 6 Rain or Shine (play on the phrase “come rain or shine”):

This is a weather app designed for people who are separated from their loved ones by geographical distance. When you are in a long distance relationship (either with a romantic partner or with family members), it’s hard to participate in their life. For example, when you live together, it’s natural to remind your loved ones to bring an umbrella or a jacket but when you experience a completely different weather, it’s hard to notice these small things. This app allows you to input location of your loved ones (and/or yours) and it displays the icon of appropriate clothes or accessories based on the weather of the location. In addition, you can send pre-generated messages to your loved ones to let them know that you are thinking of them.
